We have 34 registered users. Well we HAD 34 registered users. Now we have 18. Seems some automated systems from sites like "buy-sigs-24h.com" and other ciggeratte and pharmacy named sites registered as users, but either never got past the e-mail verification or their crawlers couldn't find a post-to-forum link so they never bothered us. I've left three accounts because they are registered and active and don't have supspicious names/e-mail addresses. However if I don't see/hear anything from them soon I'll probably delete them too. So yeah, eat that forum spammers! Eat it!{mos_sb_discuss: 4}
